

Lutron Roller Shade Kits

Quiet daylight control with a clean, architectural finish.

Lutron reference imagery reframed for design inspiration.

Motorized roller shades offer a simple way to manage glare, privacy and room darkening. Plumridge helps coordinate the roller system, fabric and top treatment with your space and Lutron control requirements. The final kit or assembly is confirmed before quotation.

Top treatments	Exposed / fascia / recessed pocket
Power	Selected wired or battery systems
Fabric	Solar filtering or room darkening
Sizing	Assembly-specific limits confirmed before order

Select the light control

Choose a performance solar fabric to filter light and preserve selected views, or a room-darkening fabric for greater privacy. Openness, color and installation affect the result.

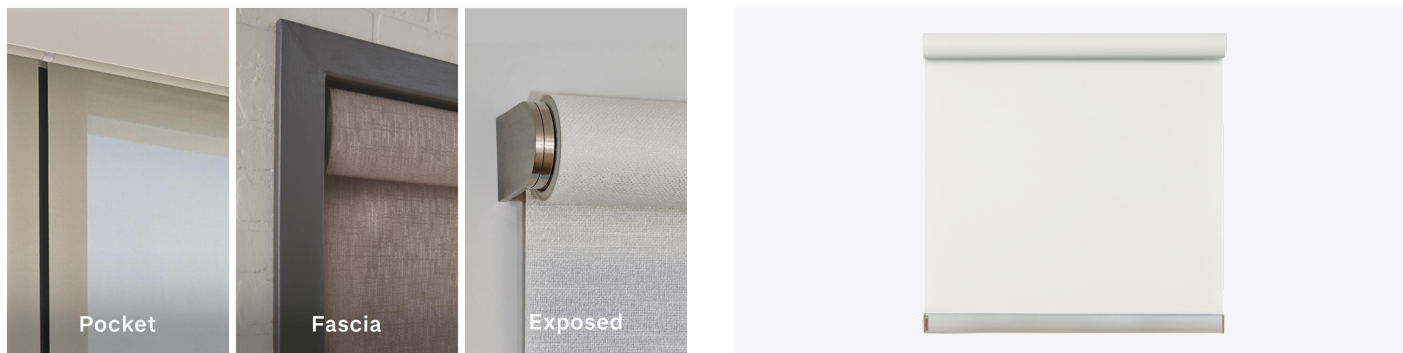

Choose the top treatment

Lutron lists exposed rollers, metal or fabric-wrapped fascias and recessed pocket installations. Each needs its own mounting clearances and service access.

Power and control

Low-voltage wired and wire-free battery options are available across selected Lutron families. Compatibility depends on the exact shade family and Lutron system, so we specify them together.

Specification and integration

Lutron top-treatment references and roller assembly.

Large or unusual windows

Specialized wide and tensioned systems may suit large spans, angled glazing or skylights. Final width, fabric area and mounting limits are checked against the selected assembly.

Room-darkening details

Opaque fabric alone does not eliminate light around the edges. Review overlaps, side gaps and any available side channels or pocket details when a dark room is required.

Can I install a roller in a ceiling pocket? A pocket is possible with suitable planning. Provide the pocket dimensions, mounting surface and access details so the selected roller can be serviced.

Are all roller fabrics suitable for every kit? No. Fabric width, weight, roll diameter and the selected motor determine the suitable assembly.

Project checklist

- Choose the Lutron shade family, fabric and control platform together.
- Confirm roller diameter, top treatment, side gaps and service access.
- Review the installed result for privacy and room-darkening needs.

Design Consultation

Share measurements, fabric or heading, track layout, power and the Lutron system.
