

Motorization

Drapery, Roman and roller shade systems, thoughtfully coordinated with your home.

Lutron reference imagery reframed for design inspiration.

Bring movement, privacy and light control together. Plumridge helps select the motor, track or shade kit, fabric and controls as one coordinated window treatment. Explore the five systems below, then share your measurements and control requirements for a design consultation.

Project service	Custom specification and quotation
Controls	Remote, wall control or suitable automation interface
Installation	Power, mounting and access planned before fabrication

Lutron | Forest Integration

Custom drapery on Forest Shuttle tracks, operated through a suitable Lutron contact-closure interface or an independently specified automation controller. Explore wired and rechargeable motor options.

Lutron Roman Shade Kits

Pair a Lutron Roman fabrication kit with custom fabric and Plumridge sewing. Plan the lift system, mounting depth and folded stack together.

Lutron Roller Shade Kits

Explore motorized roller assemblies, power options and top treatments for daylight filtering or room darkening. Fabric and kit availability are confirmed for each project.

Specification and integration

Roman and roller shade inspiration. Lutron reference photography.

Heavy-Duty Drapery Motors

Direct-drive systems for substantial drapery, long spans, theaters and hospitality interiors. Motor and track selection follows the actual hanging weight and layout.

Curved Motorized Tracks

Single bends, bay-window layouts, double tracks and selected reverse curves, subject to the capabilities of the chosen system. Explore the nine technical layouts.

Where do I start? Send the window dimensions, photographs, desired fabric or heading, preferred opening direction and the name of your control system.

Can the treatments move together? Group operation and scenes depend on the selected motors, interface and control system. We coordinate the required equipment with your integrator.

Project checklist

- Confirm the Lutron platform, interface and desired scenes.
- Review the fabric weight, mounting and power before ordering.
- Commission the complete motor, track and controls together.

Design Consultation

Share measurements, fabric or heading, track layout, power and the Lutron system.
